

Sustainability Council Minutes

September 18, 2015

[SustainabilityCouncilWebpage](#)

Attendance: Ray Stoupa; Ed DuPree; Mike Cherney; Bill Hamilton; Ryan Wishart; Mary Duda; Joe Zaborowski; Amy Helms; Larry Hopp; Scott Williams; Peter Maas; Ellen Townley; Jessica Sheldon; Anton Yanchilin

Meeting Began at 2:05pm

- Laudato Si reading group, hosted by Collaborative Ministry. 3 sessions (over breakfast or lunch)
 - Bringing in people from across campus
 - Largest book group Collaborative Ministry has ever had.
 - Good discussions
- Now is the time to build on the momentum of Peak Day, Laudato Si, etc to ask for more projects, etc.
 - Arts and Sciences interested in taking it to next level; has expressed interest in large events, especially collaborating between Environmental Sciences, Energy Technology, and Sustainability majors.
 - Energy Saving Committee is only focusing funding on 5-year payback. The items the Council is interested in are different but could complement the Energy Saving Committee's initiatives.
 - Items that were discussed:
 - Hosting/co-hosting a speaker in the spring. For instance, R. Wishart is working on live-streaming the keynote speech (Naomi Klein) at the Climate Change conference at Loyola University Chicago, possibly with screening the film or hosting a book group.
 - Purchase of "smart strips" for residence hall rooms or offices. A good summary of these power-saving devices can be found here:
<http://science.howstuffworks.com/environmental/green-tech/sustainable/smart-power-strip.htm>
 - Solar panels on more buildings
 - Public transit pass-to-class like at UNO/Metro.
 - Fixing recycling program
 - New trash/recycling bins, or a recycling center, in residence halls and other areas
 - Trash cans say "landfill" instead of trash at Loyola-Chicago. A simple but meaningful wording change
 - New cans in Skutt have recycling and trash next to each other.
 - Renewed training/signage
 - Energy-saving behavior change; we need ongoing awareness
 - Light-switch reminders
 - "Hire" on-campus people to do sustainability topics. For instance, communications staff to work on Welcome Week programming
 - On-boarding for new fac/staff/students
 - Energy hotline – find issues and send to Facilities
- Peak Day program with Verdis Group
 - People were excited to participate
 - Emails, signage on doors, digital signage
 - Good feedback
 - Still analyzing data to determine savings

- Comments were provided on the Energy Conservation Policy that has been updated by the Energy Saving Committee

Meeting Adjourned at 2:10pm
